SUMMARY

Data Engineer with hands-on experience in SQL, Excel, Power BI, and data pipeline development. Skilled in transforming complex datasets into reliable analytical assets through ELT pipelines, workflow automation, and reconciliation processes. Strong in data storytelling, dashboarding, and stakeholder communication.

WORK EXPERIENCE

Data Engineer — Implere Technologies

Sep 2025 – Present

Client: Bluecopa

- Handling large-scale financial data for Bluecopa, supporting analytics and reporting use cases.
- Designing and maintaining end-to-end data pipelines implementing ELT processes.
- Automating data workflows using triggers and scheduled workflows to ensure timely data delivery.
- Performing data reconciliation to ensure accuracy, consistency, and completeness across systems.
- Extracting, exporting, and integrating data from multiple heterogeneous data sources.

Freelance Independent Contractor (Q&A Computer Science) Chegg India Pvt. Ltd. Mar 2022 – Jan 2023

- Solved advanced Computer Science problems covering Data Structures, Algorithms, DBMS, and Operating Systems.
- Delivered accurate, plagiarism-free technical solutions within strict turnaround time SLAs.
- Maintained high quality standards aligned with academic integrity guidelines.
- Strengthened analytical thinking and structured problem-solving across diverse technical domains.
- Worked independently in a remote engagement model ensuring consistency and reliability.

PROJECTS

Weather Analysis

[View Project](#)

- Analyzed global weather data across 50+ cities (2012–2017) to identify seasonal and climate trends.
- Engineered complex SQL queries to analyze temperature, rainfall, wind patterns, and pressure anomalies.
- Built interactive Power BI dashboards using DAX, including heatmaps and time-series trends.
- Structured analysis using the MECE framework for clarity and scalability.
- Delivered insights applicable to urban planning and energy demand forecasting.

DataPlay Placement Dashboard

[View Project](#)

- Analyzed student placement data across branches, gender, companies, and salaries using Excel/CSV.
- Implemented DAX KPIs for placement rate, average/max CTC, and salary bands.
- Visualized branch-wise performance and high-paying offers to highlight key trends.
- Enabled dynamic insights through interactive slicers and filters.
- Delivered reports to support data-driven placement decisions.

SKILLS

Technical Tools	SQL, Power BI, MS Excel, Python
Data Engineering	ELT Pipelines, Workflow Automation, Data Reconciliation
Software	PostgreSQL, Google Colab, Microsoft Excel, Microsoft Power BI, Power Query, VS Code, Azure Data Studio
Soft Skills	Analytical Thinking, Decision Making, Communication

EDUCATION

MBA (Information Technology), Dr. A.P.J. Abdul Kalam Technical University, Lucknow	2024–2026
B.Tech (Information Technology), Dr. A.P.J. Abdul Kalam Technical University, Lucknow	2019–2023
CGPA: 7.57
